Certified materials

A dark blue world map is the background, overlaid with a network of thin white lines connecting various glowing white nodes across the continents. The text 'INKAS®' is in white and 'Global Presence' is in a light blue color.

INKAS® Global Presence

INKAS® Armored Vehicle Manufacturing produces armored vehicles for government authorities, financial institutions, law enforcement agencies, corporate entities, and individuals all over the world. The company supplies armored vehicles to more than 50 countries across five continents offering delivery to all major seaports and airports.

INKAS® Armored Vehicle Manufacturing

INKAS® Armored Vehicle Manufacturing is a leading armored vehicles manufacturer since 1996:

- ✓ A team of highly skilled engineers able to provide customized solutions based on requirements of the customer
- ✓ Large investments in the R&D of high-mass efficient armor, composites and integrated design solutions
- ✓ Best practices in quality management and manufacturing flexibility
- ✓ Innovative technologies in metal fabrication
- ✓ Modern equipment conforming to the world standards
- ✓ Almost 20 years of experience in production and service of armored vehicles

INKAS® manufacturing facilities:
Toronto, Canada, and Lagos, Nigeria

Sales offices and after-sale workshops:
Colombia, Ghana, Nigeria, Russia and Spain

Innovative Armoring Technologies

INKAS® employs the latest line of CNC cutting and bending machines supplied by the world leader in steel processing systems. Implementation of latest technologies in laser cutting and bending, which don't affect the metal structure, results in our ability to supply armored vehicles that guarantee safety and security

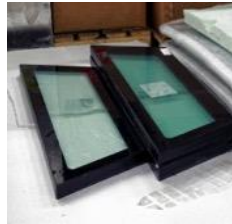

Fiber Laser Cutting

CNC Brake Press Bending

Certified Materials

At INKAS®, we only use certified materials. All our components are tested by independent laboratories as well as by our trained staff at the shooting range.

Ballistic glass

INKAS® Special Purpose Vehicles

INKAS® Sentry APC

INKAS® Sentry APC

- INKAS® Sentry APC is an 8-passenger tactical attack and defense vehicle, which is able to protect its passengers in high threat environments within any climate condition
- Unique technical specifications, design and assembly
- A high level of maneuverability, off-road performance and comfort to the passengers
- Vehicle body is fully encapsulated to provide perimeter armor protection against 7.62x51mm NATO (.308 Winchester) AP ammunition, in accordance with European Standard EN1063:1999 Level B7
- Designed to be used by military forces, SWAT, and other law enforcement agencies all over the world

INKAS[®] Sentry APC

- Custom-designed components upgraded to provide increased weight capacity and reliability
- Perimeter armoring of the passenger compartment, engine bay as well as key mechanical components
- The extra layer of cabin insulation and smart ventilation system
- The vehicle's configurable seating arrangements allow its occupants to efficiently operate the vehicle while maintaining tactical positions
- Among other security features, this model can be equipped with an escape hatch, siren/PA system, emergency lights package, electronic military system as well as external view cameras providing 360° F.O.V.
